If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

DETAILED ACTION

In view of the BPAI decision dated on January 9, 2009, the following is an examiner's statement of reasons for allowance:

In claim 1, as indicated by BPAI on page 12, the prior art fails to disclose or suggest "the claimed gas flow modification means includes a generally cylindrical, longitudinally extending tail cone 140 having a distally pointing tapered end portion 141 with a generally conical shape and housing 110 with increasing diameter defined by section 111 (Facts 1-3). According to Appellants' Specification, "[t]he combined reduction of the tail cone 140 at tapered end 141 and the increasing diameter of the housing at flared section 111 forms an annular diffuser which increases the cross sectional area available for gas flow and thereby reduces the velocity of the gas and tends to flatten the velocity profile of the gas" (Facts 3 and 4)" in combination with the additional features recited therein.

In claim 21, as indicated by BPAI on page 8, the prior art fails to disclose or suggest the claimed recycling means as follows: "Recycle manifold 330 includes one or more pipe branches 331 extending from the side wall 304 of housing 301 for drawing flue gas from the proximal portion 303 of the chamber. The pipe branches 331 connect to a pipe main 332. Ammonia, or other reducing agent, is injected into the pipe main 332 at inlet 338. The recycled flue gas is directed through horizontal distributor pipe 334 and return pipes 335. The return pipes 335 are laterally spaced apart and provide a return of recycled flue gas into multiple regions of the convention section 20. A valve

333 is a means for controlling the recycling of the flue gas and thereby provides spill back control for the system 10. The recycling of the flue gas helps to reduce fluctuations in the ammonia content of the flue gas entering the catalyst bed by more thoroughly distributing the ammonia" in combination with the additional features recited therein.
